

FULL STACK AI SAAS ENGINEERING

BUILDING AN AI MODEL IS IMPRESSIVE. BUILDING A COMPLETE AI
SAAS PRODUCT THAT THOUSANDS OF USERS CAN ACTUALLY USE IS
WHAT MAKES YOU A FULL STACK AI ENGINEER.

WHAT IS FRONTEND?

- User Interface (UI)
- What users see and interact with
- Displays data from the backend
- Handles user experience (UX)
- Built using modern frontend technologies

WHAT IS BACKEND?

- Business logic of the application
- Processes user requests
- Connects AI models and databases
- Handles authentication and security
- Returns responses to the frontend

WHAT IS AN API?

- Communication bridge
- Connects frontend and backend
- Sends requests and receives responses
- Enables different systems to work together
- Core of modern applications

WHAT IS A DATABASE?

- Stores application data
- Saves users and application records
- Supports fast retrieval
- Essential for scalable applications
- Keeps data organized

WHAT DOES FULL STACK MEAN?

- Builds both frontend and backend
- Works with APIs and databases
- Creates complete applications
- Understands the entire system
- End-to-end development

WHAT IS NEXT.JS?

- React Full Stack Framework
- Built by Vercel
- Server-Side Rendering (SSR)
- Static Site Generation (SSG)
- API Routes
- Server Actions
- Fast Performance
- SEO Friendly
- Production Ready
- Ideal for AI SaaS Applications

WHAT IS A SAAS PRODUCT?

- Software as a Service
- Cloud-based software
- Accessible through a browser
- No installation required
- Subscription-based business model
- Automatic updates
- Scalable for millions of users
