

AI-POWERED SOC ANALYST SAAS

WHAT IF YOU COULD UPLOAD A SECURITY LOG AND HAVE AI DETECT
THE THREAT, EXPLAIN THE ATTACK, AND GENERATE A REMEDIATION
PLAN — IN REAL TIME?

GUARDAI?

- AI-powered SOC Analyst SaaS
- Upload security logs and documents
- AI analyzes suspicious activity
- Detects potential threats
- Generates severity and attack insights
- Creates actionable remediation plans
- Real-time streaming AI experience
- Secure multi-tenant architecture
- SaaS-ready with Free & Pro plans

NEXT.JS + AI SDK

- Next.js 16 App Router
- Tailwind CSS
- Framer Motion
- File upload
- Server Actions
- Supabase integration
- PostgreSQL
- pgvector
- Embeddings
- RAG pipeline
- AI threat analysis

PREMIUM STREAMING UI

- Cybersecurity dashboard
- Dark SOC-style interface
- Real-time AI streaming
- Threat severity indicator
- Threat score
- Attack visualization
- Remediation cards
- Streaming components
- Loading states
- Smooth animations

AUTHENTICATION & MULTI-TENANT SYSTEMS

- Supabase Authentication
- Email authentication
- Google OAuth
- Protected routes
- User sessions
- PostgreSQL
- Row Level Security (RLS)
- Tenant isolation
- Secure server-side validation

PAYMENTS, LIMITS & AI MONETIZATION

- Free Plan
- Pro Plan
- Lemon Squeezy
- Subscription checkout
- Webhooks
- Usage tracking
- Scan limits
- Upstash Redis
- Rate limiting
- Usage dashboard
